

Super-Slim Rainwater Tank

A no compromise rainwater storage solution

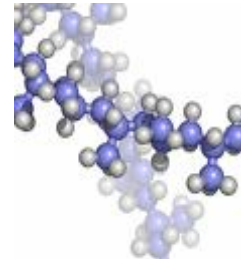

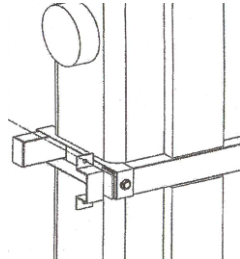

The Super-Slim Rainwater Tank is the narrowest wall mounted tank available and its unique design makes it visually discreet and easy to install. Multiple tanks can be joined together to achieve the desired storage capacity. It is affordably priced and easy to integrate into a wide range of above ground urban rainwater collection and utilisation systems.

The Super-Slim Rainwater Tank offers the following benefits compared with conventional rainwater storage solutions.

- **Super-Slim tank**, each 180 x 72 x 19cm that contains approximately 220 litres of rainwater.
- **Modular design**, for either single or multiple tank installation.
- **Visually discreet**, slim profile making it ideal for installation along side walls and narrow passages.
- **Easy to install**, using DIY tools.
- **Proven and reliable**, installed and tested since 2002.

The Super-Slim Rainwater Tank is manufactured to the highest standards using advanced technology and incorporates;

- An opaque high density food grade polyethylene.
- A stabilizer for added UV protection.
- A unique design using internal interlocking baffles to provide strength and rigidity.
- A steel support frame for lateral support and withstanding wind load.
- A simple interconnect hose coupling for installing multiple tanks.

About Renergise
