

Super Slim Wall Tank Rainwater Harvesting System

The complete entry level rainwater harvesting system for retrofit, smaller property and installing in a confined space, incorporating a wall tank, filter, rainwater delivery pump and mains top up valve.

The Super Slim Wall Tank System is modular, easy to install and durable and is manufactured to the highest standards. This proven product incorporates the best features of above ground rainwater harvesting design and is ideal for supplying water for toilet flushing, laundry and garden use. The system features;

- 440 litre Super Slim base tank system (only 19cm wide) with add-on tanks in 220 litre increments
- Anchored to a wall with a galvanised steel support frame
- Secure inter tank connection
- High performance Frogmouth filter diverter and optional Lazy Lizard finer second stage filter
- Quiet and energy efficient pump that delivers rainwater on demand to connected services
- Automatic mains water top up valve
- Requires a single downpipe connection and power point
- Supplied with pack of regulation advisory labels

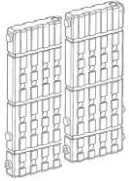

The tank system is made from high density food grade polyethylene and all components feature high levels of UV protection. The system is easy to install by a competent DIY or general trades installer. When a connected service demands water, the pump is activated to draw water from the tank. In the event that demand exceeds the available rainwater a mains water valve is automatically opened to partly refill the tank.

Simple – Reliable – Affordable

1. Filter diverter
2. Modular tanks
3. Tank outlet
4. On-demand pump
5. Connected services
6. Irrigation via hose and rose gun
7. Mains water top up valve

Specification

<p>Tank System</p>		<ul style="list-style-type: none"> • Twin tank 440 litre base unit is 160 x 19 x 180 cm including the steel support frame and wall fixings. • Including the Frogmouth Filter the overall length is 190 cm. • Each incremental 220 litre tank adds a further 80 cm to the length of the system. • Supplied with self install 1/2" BSP outlet fitting and tank connector
<p>Filter Diverter</p>		<ul style="list-style-type: none"> • The Frogmouth is an efficient first stage filter that through its unique low maintenance design removes leaves and gutter debris. • Incorporates a durable 1000 micron stainless steel filter and can be installed in a standard 68mm O.D. round downpipe and adapted to other sizes and profiles. • Also features rainwater diverter, tank overflow and backflow prevention. • Lazy Lizard finer second stage filter available as an optional extra
<p>Electronic Pump</p>		<ul style="list-style-type: none"> • 7 lpm flow rate ideal for toilet cistern replenishment and micro irrigation. • Requires 230v 50Hz power supply • Standard bare pump and connection kit or optional plug-n-play unit • Pump is mounted inside the property. • Pressure switch activates pump when water is demanded. • Quiet and energy efficient to operate.
<p>Mains Top Up Valve</p>		<ul style="list-style-type: none"> • Automatic mains water top up • Requires 230v 50Hz power supply • Top up activated by tank mounted float switch • Complies with water regulations • Standard mains top up kit of components or optional plug-n-play unit

About Halsted Rain

Halsted Rain is a supplier of urban rainwater harvesting and waste water recycling. We offer a range of modular tanks, filters, pumps and mains top up units designed for above ground and low profile belowground systems that offer simple and affordable solutions particularly when space and access is restricted or ground conditions are poor. Our products are ideally suited for residential and light commercial property and as a retrofit solution.
